<b>Modifications</b>	Camperize Camper Fitout and Camper Roof Conversion
<b>History</b>	<p>This Caravelle GL was originally sold in July 1991 by Northshore Volkswagen to Walkabout Tours. Walkabout Tours specialized in offering tours to European, and mostly German, retirees. The vehicle is understood to have ferried tourists to and from Sydney Airport to the Hotel, and then to tours throughout the Blue Mountains. This is perhaps why a comfortable and capable 4WD was specified for the job.</p> <p>The vehicle was then purchased in 1996 by Harry Fuller, of the Illawarra, at which time it was promptly converted to a camper. It is believed to be one of the few Caravelles converted to a camper in the 1990s. Harry further customized the vehicle to include a Solar Panel.</p> <p>Harry regularly serviced the Syncro at Dunhams and the Syncro enjoyed at least 1 around Australia trip including remote locations such as Boroloola on the Gulf Coast</p>
<b>Today</b>	<p>This Syncro now enjoys more relaxed and infrequent touring throughout the East Coast several times per annum, and regular short weekend trips near Sydney. A roof top bed has been fitted for children, as well as an upgraded Entertainment system.</p>
